

Zahir J. Choudhry

San Francisco, CA | Email: Zjchoudhry@gmail.com | <https://github.com/BiggestZ> | [LinkedIn](#)

Executive Summary:

Software engineer with strong foundations in computer science and mathematics (Cum Laude, Dean's List) and practical experience in AI agent development, distributed systems, and full-stack engineering. Proficient in Python, Java, and C++, with expertise in Agentic AI development, MCP tools, data pipelines, and AI/ML frameworks. Experienced in software development through internships at Gentoro and Onto Innovation.

- Proficient: Python, Java, C++
- AI Agent Development including Cursor, LangChain, LangGraph, MCP, LLMs
- Fundamentals of AI, Automata Theory
- Curriculum design and technical instruction
- Strong written and verbal communication

Experience:

Gentoro.ai

July 2025 - Present

AI Engineer (Intern): Developing Generative AI Agents and applications

- To aid the recruiting process, designed and developed an AI Agent to screen resumes for a fit in comparison to provide job description. Worked closely with the principal engineer.
- Leveraged MCP servers to integrate 4 dense APIs consolidating scheduling and notifications into a single streamlined application
- Built a Flask-based document ingestion platform that automatically triggers downstream processing, reducing hours of manual resume processing time
- Implemented real-time file-watcher pipelines to detect and process new resumes instantly, accelerating candidate-to-job matching turnaround from hours to near real-time
- Optimized usability by ensuring the system can be easily configured and deployed with minimal technical knowledge

Onto Innovation - Optical Engineering Dept

May 2024 - August 2024

Software Engineer (Intern): Developer data visualization for Onto interferometer

- Leveraged software development and UI/UX principles to create applications that improved usability and streamlined lens analysis for all optical engineering teams
- Developed a data visualization tool to reduce optical lens comparisons from 2+ hrs to 5 min
- Presented technical demos to senior engineers & board members, securing executive approval for framework adoption across all engineering teams"
- Partnered with clean room staff to diagnose software bottlenecks, architected scalable solutions, and presented technical recommendations to upper management

Occidental College, Los Angeles

January 2024 – May 2025

SSAP CS Tutor: Aided students of all levels in Computer Science

- Tutored over 100+ students for over 150 hours in Python, Java, and C++
- Provided comprehensive mentorship to 3 students per semester, resulting in enhanced study strategies, clearer career paths, and measurable academic improvement"
- Collaborated with faculty to develop supplemental materials and workshops to enhance student learning outcomes, increasing office hour and Tutoring attendance by 100%

Education:

Bachelor, Computer Science with Math, Cum Laude, Occidental College, | August 2021 - May 2025, Chinese University of Hong Kong, Study Abroad, August 2023 - December 2023
